SUMMARY

Full-stack developer proficient in the MERN stack, React.js, and Next.js. Passionate about building scalable applications and solving complex problems.

EDUCATION

Swarnim Startup and Innovation University
Bachelor of Technology in Computer Engineering

Ahmedabad, Gujarat, India
Current SGPA: 9.40/10

PROJECTS

LiveDocs [Next.js, TypeScript, Liveblocks, Lexical Editor, Tailwind CSS]

- Developed a real-time collaborative text editor focused on simplifying document collaboration and boosting productivity through seamless multi-user editing.
- Implemented document management features, including create, delete, and share, for efficient workflow.
- Enhanced user experience with inline comments, presence indicators, and activity notifications for seamless communication.

Postgram [React.js, Appwrite, React Query, TypeScript, Shadcn, Tailwind CSS]

- Built a responsive social media platform with features for exploring, liking, and saving posts, plus a detailed post view.
- Developed user-friendly profile and post management, including create, edit, and drag-and-drop file functionality.
- Utilized Appwrite for backend services and React Query for efficient data fetching and caching.

Portfolio [React.js, Three.js, React Three Fiber, React Three Drei, Email JS, Tailwind CSS]

- Developed an immersive 3D portfolio website using React.js, React Three Fiber, and Three.js, creating a unique and engaging user experience.
- Implemented interactive features such as a dynamic project showcase and animated timeline.
- Integrated email functionality using EmailJS, enabling visitors to easily contact you through the website.

ProdStore [React.js, Node.js, Express.js, MongoDB, Chakra UI]

- Developed a responsive product listing website using React.js and Chakra UI, focusing on a clean and user-friendly interface.
- Implemented full CRUD operations for product management, allowing users to add, update, view, and delete products.
- Utilized Node.js, Express.js, and MongoDB to build a backend for data storage and retrieval.

TECHNICAL SKILLS

Languages: Java, JavaScript

Libraries/Frameworks: React.js, Node.js, Express.js

UI Component Libraries: Chakra UI, Shadcn UI, Material UI, Tailwind CSS

Databases/Servers: MongoDB, Mongoose, Appwrite

Platforms/Tools: Git/GitHub, VS Code, Postman, NPM, Netlify, Vercel
