SUMMARY

Software Developer with professional experience in **ERPNext/Frappe** and modern JavaScript-based web applications. Specialized in the building of workflow-driven ERP systems, automating complex business processes and providing audit-ready reliable solutions for enterprise environments.

EXPERIENCE

Software Developer

May 2024 – Present

Amax Consultancy Pvt. Ltd.

Ahmedabad, Gujarat

- Developed a **custom Stone Manufacturing ERP** using **ERPNext/Frappe**, digitizing stone lifecycle processes from selection to cutting.
- Engineered a **status-driven workflow system** managing 15+ stages (Selection, Transportation, QC, Carving) for process control.
- Designed **custom DocTypes and modules** aligned with business workflows, using **MariaDB/MySQL** for efficient data handling.
- Implemented **Python-based validations** to enforce business rules, ensure data integrity, and prevent invalid state transitions.
- Customized **ERPNext Desk UI** and forms to improve usability and align system behavior with real workflows.
- Developed and customized **ERPNext REST APIs** for secure data access and backend system integration.
- Designed **RBAC (Role-Based Access Control)** to manage permissions across supervisors, operators, and managers.
- Deployed and maintained the system on **cloud servers**, ensuring stability, bug fixes, and performance improvements.
- Familiar with **Accounting, Inventory, Sales, Purchase, and Manufacturing** modules (basic workflow understanding).

PROJECTS

LiveDocs | Next.js, TypeScript, Liveblocks

- Built a real-time collaborative document editor with multi-user editing, live presence, and cursor tracking using Liveblocks.
- Implemented document sharing, comments, and scalable frontend architecture using Next.js and TypeScript.

Postgram | React.js, Appwrite, React Query

- Built a full-stack social media platform with authentication, post creation, and user interactions using Appwrite as a Backend-as-a-Service.
- Optimized client-side data handling with React Query for caching, background updates, and responsive UI performance across devices.

TECHNICAL SKILLS

Frameworks & Tools: Frappe Framework, ERPNext, REST APIs, Node.js, Express.js, Git/GitHub, Postman

Databases: MariaDB, MySQL, MongoDB

Languages: JavaScript (ES6+), Python (Basic), Java, HTML5, CSS3

Frontend: React.js, Tailwind CSS, Shadcn UI

EDUCATION

Swarnnim Startup and Innovation University

Ahmedabad, Gujarat

Bachelor of Technology in Computer Engineering (SGPA: 9.40/10)

2021 – 2025

Higher Secondary (Class XII)

Science Stream

2021

CERTIFICATIONS

Frontend Developer (React) – HackerRank

JavaScript – HackerRank

Introduction to Java – Coding Ninjas
